TCB Industrial offers you single-source solutions for heavy industrial construction

An award-winning general contractor and construction manager, TCB Industrial is dedicated to meeting your needs with exceptional quality and safety on every project. TCB offers a wide range of general construction services to industries including:

- Power Generation and Utility Companies
- Manufacturing and Production
- Ports and Harbors
- Automotive and Distribution
- Surface Mining

TCB provides turn-key services — ranging from basic facility maintenance to general site construction — to the public and private sectors. Other available services include metal fabrication, piping installation, equipment repairs and installation, rigging, code welding, and plant outages.

Based in Modesto, California, TCB's expert team consists of highly qualified professionals who are committed to your success and recognize the importance of the big picture, as well as the smallest details. Whether it's a simple tenant improvement or a large-scale construction project, TCB consistently keeps projects on schedule and within budget.

TCB delivers total construction solutions by leveraging diverse in-house experience, expertise and a laser focus on your operational, environmental, and functional needs. From rehabilitating a hydroelectric plant to relocating manufacturing facilities, TCB is known for unparalleled service, quality workmanship and safety. Plus, a reputation for building projects right the first time keeps TCB client satisfaction high and repeat business consistent.

TCB's general construction and civil services include construction, repairs, and maintenance for:

- Hydroelectric Power Plants
- Substations
- Commercial Site Development
- Structural Concrete & Bridges
- General Building
- Dams & Weirs
- Tenant Improvements
- Shipyards & Ports
- Pipelines
- Recreational
- Structural Repairs & Improvements
